

BENEFITS OF E-INVOICING

Reduced processing costs shared by common partners

Reduced error margin

& environmental preservation

Reduced document loss

Shorter time limit for invoice validation

Workforce assigned to higher valued tasks

... No transport
... No storage
... No paper

In a few figures

- 16 billion B2B invoices are processed every year in Europe. According to the Deutsche Bank, this could represent an annual cost saving of around 260 billion Euros.
- Large companies keep up to 6 copies of their invoices. Considerable savings can be made in paper and trees.
- More than half of companies bill electronically.

Cost for a company

An electronic invoice is **25% less expensive** than a paper invoice!

Cost savings are shared by common partners
